22126 Leirop Dr., Richmond, TX 77407

SUMMARY

A dedicated cybersecurity student who has sharpened his technical abilities through hands-on projects using open source software, while concurrently building knowledge on industry standard technologies through relevant coursework.

EDUCATION

Houston Community College – Houston, TX

2022 – May 2025

- Major: Associate's of Applied Sciences in Computer Systems Networking, Specializing in Cybersecurity
- Expected to Graduate By: **05/2025**

TECHNICAL SKILLS

Linux, Bash, Powershell, Python, Java, JavaScript, HTML, C, C++, Git, Docker, LXC, LibVirt, VMWare, Windows Client and Server Operating Systems (taken college course), Microsoft Word (working knowledge)

PROJECTS

- Has installed and configured OSSEC for event management, as well as written a few rules to better suit needs within home-lab.
- Installed and configured OpenWRT, as well as written firewall rules within iptables to block and monitor traffic.
- Configured and has been using Wireguard to connect to personal systems when away from home.
- Has used Arch Linux as primary desktop and server operating system for 4 years.
- Has configured network shares on Windows 10 and XP and connected via Samba's smbclient.
- Composed and has been using scripts in Bash, Python, and Make in order to automate routine, long-running tasks, such as backups, as well as to simplify complex commands, as, for example, installing virtual machines in LibVirt.
- Used Ansible to perform tasks on multiple machines simultaneously.
- Operates a small game server hosting 5 people with 90% uptime on-premises.

COMPETENCIES/SOFT SKILLS

- Can prioritize tasks to the effect that orders take priority over routine.
- Can collaborate within teams effectively both orally and in writing.
- Open-minded and respectful of others' opinions and choices. For example, applications that may be able to perform the same function are tailored to different markets.

Relevant Coursework: ITMT-1358 Windows Client Operating System, ITSC-1307 UNIX Operating System I, ITCC-1414 CCNA1: Introduction to Networks, ITSY-1342 Information Technology Security, COSC-1436 Programming Fundamentals I (C++), ITMT-1357 Administering a Windows Server Operating System, ITSY-2330 Intrusion Detection, ITSY-2401 Firewalls & Network Security, ITSY-2443 Computer System Forensics, ITSY-1491 Special Topics in Information Technology/Security

Certifications

CompTIA Security+ SY0-701
